(24) "The home we first knew on this beautiful earth, the friends of our childhood, the place of our birth, in the hearts of inner chamber sung always will be, as the shell ever sings of its home in the sea." (25) Reindeer. (26) Skaters. (27) "There is something so divine, description would but make it less, 'tis what I feel, but can't define, 'tis what I know, but can't express." (28) "Let your boat of life be light, packed with only what you need; a homely home and simple pleasures, one or two friends worth the name, someone to love and someone to love you, a cat, a dog, and a pipe or two, enough to eat and enough to wear, and a little more than enough to drink, for thirst is a dangerous thing." (29) "A glass is good, and a lass is good, and a pipe to smoke in good weather; the world is good, and people are good, and we're all good fellows together." (30) "The Christmas Love Bird. The Merry Christmas bird comes but once a year; he sings about a people's love, spreads the season's cheer."

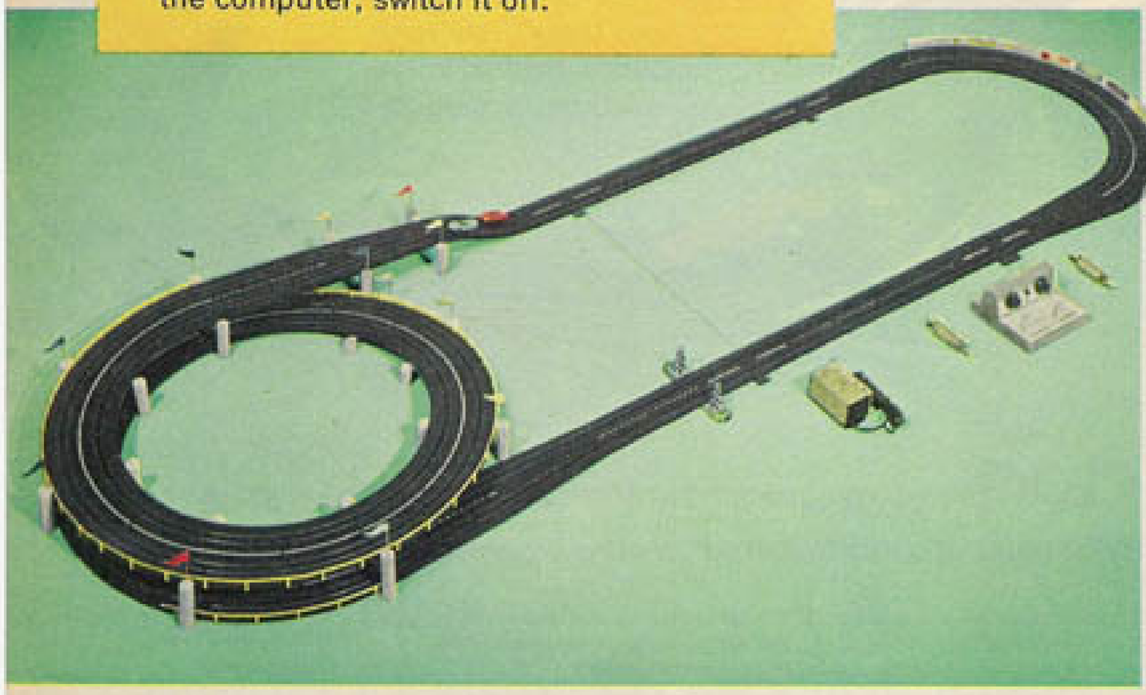
MODEL AURORA MOTORING

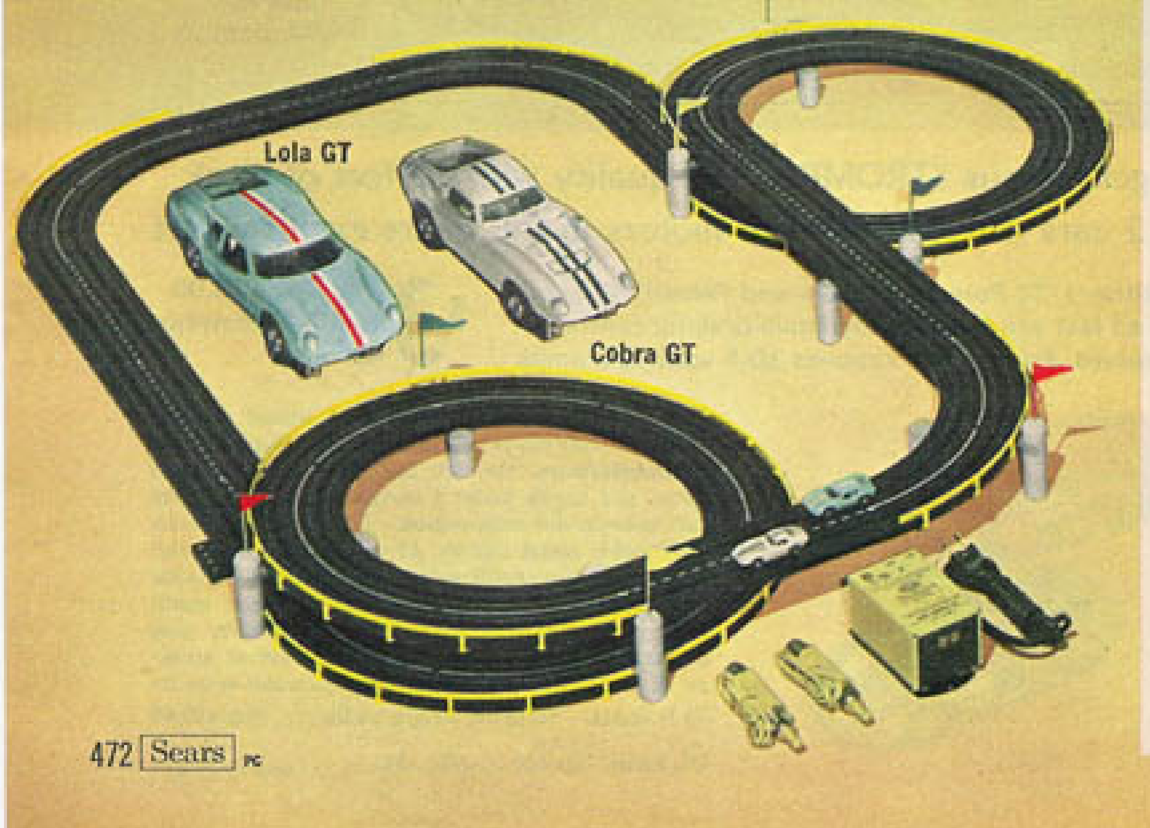
HO-SCALE

Featuring the fastest



This Computrac unit electronically controls a pace car to race against the car that you control. Computrac is programmed to "know" exactly when to slow down for curves, when to "floorboard it" for straightaways. With practice and daring, you can win. Or, if you want to race the cars without the computer, switch it off.

Race your car against a pace car that's controlled by a Computer



Sears exclusive 2-lane set, over 25 feet of track **$29.77** cash **$4.00 monthly**

You get a set of charts that evaluate your car's performance against the maximum speeds set by the computer-controlled car. It's an accurate way to keep a record of which car performs best when you compete with others. This is important because no 2 cars—even of the same model are identical in racing speed. Tire wear and poor lubrication may be the reason you're coming out 2nd best in the racing circuit. By using the charts you can determine which of your cars should win on a curvy or straight course.

The wide bed roadway around all curves is another feature of this exclusive Sears set. If you accelerate just right, you can power slide around any curve without rolling over. Gives your cars wider passing distance and wider shoulders for skids, slides or spin-outs.

You get 2 sport racers—the Ford GT and the Chaparral, powered by Hi-Torque Thunderjet 500 motors. 32 pieces of plastic and metal roadway track. Guard rails, trestles, flags, signs. 2 plunger-type controls. 20-volt Power Pack. 110-120-volt, 60-cycle AC. UL listed. Guide book for charts. Plus the famous computer that will help increase your driving skill. Layout 8½x2⅔ feet wide.

Down through the years, people have

..because of the imaginative products and ideas that dreams are made of

BACK IN THE EARLY 1900's, Sears catalogs were offering to the American public such "new" and diverse items as Seal Plush Capes for ladies, Knee-pant suits for boys, Cream Separators for farmers, and Horseless Carriages for the venturesome. Along with these then-imaginative products went the more usual assortment of values in underwear, watches, shoes and millinery.

Then, as now, it was this broad variety of merchandise, made so easily available to so many people, that caused our catalog to be known as "The Wish Book."

In this Christmas Catalog for 1968, we have tried to set a new standard for ourselves—to give you a new, broader choice of the unique, the traditional, the down-to-earth, all as near to you as your telephone.

In this book are numerous items as interesting and unique as the Mink Robe on this page—and many outstanding values like those offered on the page opposite to this. It is Sears hope that you will find in this 594-page Catalog just the gifts you are looking for—gifts that will make you glad you shopped from "The Wish Book."

Down through the years, people have

..because of the imaginative products and ideas that dreams are made of

This Suit of Armor of Toledo steel is copied from the period of Charles V

For just a brief moment in history, the 100 years between the development of the longbow in the 14th century and the cannon in the 15th century, knights clad in shining plate-armor stood as invincible champions on the battlefields of Europe. It was then that the craft of the armorer flourished as never before or since.

The achievements of these skilled craftsmen were truly remarkable, for they created plate armor that was hammered so thin a complete suit weighed as little as 35 pounds . . that was designed with such skill an arrow shot from a longbow would deflect harmlessly away regardless of where it hit the armor . . and that had such beauty and simplicity of form it has been described as "sculpture in steel".

Unhappily, most of this original armor has been lost or destroyed through the years. And the few authenticated antiques that do exist are valued up to $100,000. But thanks to the skill of the world famous metalsmiths of Toledo, Spain, we are able to bring to you this Suit of Armor, with flat-blade sword over 3 feet long, that is an exact and rare copy of the ones used 600 years ago.

Hammered and forged of the finest steel. True in weight and scale to the original. And so accurate in every detail that it could actually be worn. Standing about 75 inches high, it makes an impressive addition to Mediterranean or Provincial furnishings. Sent fully assembled and mounted on a base as shown. Instructions for care and preservation included.

Sent prepaid from New York to all states except Alaska and Hawaii. Sorry no C.O.D. orders. Please allow extra time for handling and delivery.

Authentic Reproduction of a pony from a children's carousel

Not too many years ago, carousels were familiar sights in America. They could be seen in virtually every park and fairground . . surrounded by excited children waiting their turn in great anticipation of the wondrous ride to come.

Today the carousel is fast disappearing from the American scene. No longer are there the great wood carvers creating the animals, chariots and elaborate facades that made the carousel a fairy-tale land come to life. Gone are men like Gustav Dentzel and Marcus Illions who came from Europe at the turn-of-the-century possessing only their skill and imagination but ended up establishing carousel carving as one of the great forms of American folk art.

And so we are extremely proud to be able to offer here this authentic copy of a pony from a small carousel of the early 1900's. Cast in special reinforced plaster composition from a mold of the original so that every detail of the wood carving is duplicated. Painstakingly hand painted and expertly antiqued. The result is this outstanding reproduction of the art of carousel carving that would make a truly unique and beautiful room divider or decorative piece for a game room. 43 in. long; 28 in. high. With 8-ft. striped mounting pole and wall bracket. Shipped prepaid by freight from Chicago to all states except Alaska and Hawaii. No C.O.D. orders.

This is the Credit Card that makes Christmas Shopping easy

FORGET ABOUT THE CROWDS AND BAD WEATHER . . WITH A SEARS REVOLVING CHARGE ACCOUNT ALL YOU DO IS PICK UP A PHONE, CALL SEARS AND SAY "CHARGE IT"! IT'S THAT SIMPLE.

No money down or minimum purchase required when you use your account. Pay your charge each month within 30 days of the billing date with no service charge, if you wish—or, if you prefer, stretch your payments out over months. If you choose to do this, your monthly payments ($10 minimum) will go up or down, depending on your outstanding balance. (See schedule of monthly payments on following page). A small service charge will be added each month.

You never need to figure delivery charges—we prepay them. Sears own people will figure postage, freight or delivery charges on your order – send your package off to you prepaid, and add the charges to your account.

You don't need to keep money on hand to pay C.O.D. charges. Because the entire amount has been charged, you don't need to pay our driver. Leave home for the day if you wish; a note will tell the Sears driver to leave your package at a neighbor's.

Picking up your order is easier. No delay or money to pay. Your credit card shows you are a "charge customer."

Any Sears store or office nationwide will recognize your credit standing. Wherever you are in all these United States your credit is good – on vacation, on business trips, in any place there is a Sears unit. Just show your revolving Charge Account card. Sears will be glad to take your "Charge" order wherever you are!

We send you a statement of your account every month. Makes bookkeeping so much easier for you – a record of your purchases is always available.

You can open your account now—and order later. There is no need to send an order when you open your account . . . open it now – we will send you your card. You can start using it whenever you wish.

It's easy to start your account—here's how— Simply fill in the application and sign the agreement on the other side of this page – send it to Sears. Or you may open an account by telephone – just by calling the most convenient Sears unit. Tell our phone clerk you want to open a revolving Charge Account; she will take your application and your order at the same time, if you wish. Or visit any Sears store – they will gladly answer any questions you may have and fill out your application for you.

Maintenance agreements and charges for service and installation of Sears merchandise may also be added to your account.

SHIPPING INFORMATION

PARCEL POST SHIPMENTS: On all articles for which you pay shipping charges, the shipping weight is given in the catalog description. Enter the total shipping weight for each article in the shipping-weight column of the order blank. Add the pounds and ounces, then change ounces to full pounds (16 ounces equals 1 pound), and enter total weight in pounds. The post office counts fractions of a pound as a full pound and charges postage accordingly. For example: If your order totals 6 pounds and 30 ounces, allow postage for 8 pounds (30 ounces equals 1 pound and 14 ounces, therefore 1 pound 14 ounces plus 6 pounds equals 7 pounds 14 ounces and the post office will charge for 8 pounds).

See chart at right. If you live in Zone 3 or within 151 to 300 miles from Catalog Order Plant, the amount of postage to allow for 8 lbs. is 90c. If you send more than the effective parcel post rates, we will return the extra amount.

Be sure to show your parcel post zone number.

FREIGHT OR EXPRESS SHIPMENTS: While express is faster, freight is the most economical way to ship heavy, bulky merchandise. Before marking method of shipment on order blank, compare freight and express rates in the yellow section of Sears Fall Catalog.

When ordering on Sears Revolving Charge Account or Easy Payment Plan, shipping charges are added to your account. On cash orders shipped collect, you pay shipping charges to agent at your freight or express station when goods are received. No need to figure shipping charges.

NOTE: On cash orders, if there is no freight agent in your town, include money with your order to prepay shipping charges.

TRUCK SHIPMENTS: Not all trucking companies make deliveries to a home address. This can be verified by checking with your trucking company's local agent.

If shipment is to be made to your home and you live outside of town, also give your highway route number and some identifying landmarks.

On cash orders it is not necessary to send money to pay for truck transportation charges on your order. You pay shipping charges to truck driver when goods are received.

HOW TO SEND MONEY: The best way to send money is by post office money order, express money order, or by bank draft or check. The mail carrier will buy a post office money order for you if you live on a rural route. It is better not to send postage stamps, coins or paper money. If it should be necessary, be sure to send your order by registered mail.

Spinet-style Player-piano with 6 music rolls

Back before the stereo tape player, television and the radio, there was the player-piano. From the turn-of-the-century until 1929 when one was last listed in the pages of a Sears Catalog, it was considered the ultimate in home musical entertainment.

Now the player-piano is reborn as a completely modern instrument. This beautiful spinet by Kimball gives you two pianos in one. Played as a regular piano it produces superb concert-quality tone and resonance. Yet inside—hidden under top lid as shown in view at left—is a precision electric player unit. It has volume and speed controls, automatic rewind and even a special "uke" control that creates the authentic "old-time" rinky-tink sound.

French walnut veneer cabinetry with walnut finished hardwood molded parts. Its provincial styling goes well with virtually any room decor. 57½ in. wide, 37½ in. high, 26¼ in. deep. 88-note keyboard. Sent to you with walnut finished hardwood bench plus 6 music rolls and a music roll catalog offering 2,500 different titles. Shipped prepaid by freight to all states except Alaska and Hawaii.

Authentic St. Catherine Cutter of beautiful hand-finished, hand-shaped basswood

In 1890, it took 18 days to make a sleigh like this. Today, skilled Canadian sleigh-makers still take 18 days to make one. 18 days of the most careful and painstaking hand labor. 18 days to slowly steam and shape each individual piece of basswood to form the body and steel-edged runners . . to hand-forge the metal trim and undercarriage . . to hand-upholster the seat in plush velour . . to apply 9 finishing coats of lacquer and enamel. When done, they have built more than just a fine quality sleigh. They have created this unique and beautiful example of the true craftsman's skill . . a work of art of understandably limited supply. As an outdoor ornamentation, it would enhance the beauty of any home from Miami to Alaska. About 39 inches wide, 180 inches long with hitching shafts attached.

Shipped prepaid from Chicago, Ill. by freight (rail or truck) or express to all states except Alaska and Hawaii.
